

source code:
if max_length > 0:

max_length
Read

0

>

```
graph TD; A([max_length Read]) --> C((>)); B([0]) --> C;
```

The diagram illustrates a control flow graph for the code snippet. It consists of three nodes: a rectangular node at the top left labeled 'max_length Read', a small circular node at the top right labeled '0', and a circular node at the bottom center labeled '>'. Two directed arrows originate from the 'max_length Read' node and the '0' node, both pointing towards the '>' node, representing the branches of an if-statement.
