

source code:  
if min\_length > 0:

min\_length  
Read

0

>

```
graph TD; A([min_length  
Read]) --> C([>]); B([0]) --> C;
```

The diagram illustrates a control flow graph for a code snippet. It consists of three nodes: a rectangular node at the top left containing the text 'source code: if min\_length > 0:', an oval node at the top right containing 'min\_length' and 'Read' on separate lines, and a small oval node at the bottom right containing the greater-than symbol '>'. Additionally, there is a small oval node at the top right containing the value '0'. Arrows point from the 'min\_length Read' node and the '0' node to the '>' node, indicating a comparison operation.
