>

```
graph TD; A([zero_pad Read]) --> C((>)); B([0]) --> C;
```

The diagram illustrates a control flow graph. It consists of three nodes: a rectangular node at the top left containing the text 'zero_pad Read', a rectangular node at the top right containing the text '0', and a circular node at the bottom center containing the text '>'. Two directed arrows originate from the bottom of the 'zero_pad Read' node and the bottom of the '0' node, both pointing towards the '>' node, representing a conditional branch based on a comparison.
