if max\_length > 0:

max\_length  
Read

0

>

```
graph TD; A([max_length Read]) --> C([>]); B([0]) --> C;
```

The diagram illustrates a control flow graph. It consists of three nodes: a top-left node containing the text 'max\_length Read', a top-right node containing the value '0', and a bottom-center node containing the comparison operator '>'. Two directed edges (arrows) originate from the top nodes and point towards the bottom node, representing the flow of execution into the conditional statement.
