

source code:
if max_length > 0:

max_length
Read

0

>

```
graph TD; A([max_length Read]) --> C((>)); B([0]) --> C;
```

The diagram illustrates a control flow graph for the conditional statement 'if max_length > 0:'. It consists of three nodes: a rectangular node at the top left containing the text 'max_length Read', a rectangular node at the top right containing the value '0', and a circular node at the bottom center containing the comparison operator '>'. Two directed arrows originate from the bottom of the 'max_length Read' node and the bottom of the '0' node, both pointing towards the '>' node, representing the flow of data into the comparison operation.
