

source code:
if diagonal_score >= left_score:

diagonal_score
Read

left_score
Read

>=

```
graph TD; A([diagonal_score Read]) --> C((>=)); B([left_score Read]) --> C;
```

The diagram illustrates a control flow graph for the provided source code. It consists of three nodes: two 'Read' nodes at the top and one comparison node at the bottom. The left 'Read' node is labeled 'diagonal_score' and the right 'Read' node is labeled 'left_score'. Both 'Read' nodes have arrows pointing to a central comparison node labeled '>='.
