

source code:
if diagonal_score >= left_score:

diagonal_score
Read

left_score
Read

>=

```
graph TD; A([diagonal_score Read]) --> C((>=)); B([left_score Read]) --> C;
```

The diagram illustrates a control flow graph for the provided source code. It consists of three nodes: two 'Read' nodes at the top and one comparison node '>=' at the bottom. The 'diagonal_score Read' node and the 'left_score Read' node both have arrows pointing to the '>=' node, indicating that the values are read before the comparison is performed.
