

source code:
if x.estD < minD:

x.estD
Read

minD
Read

<

```
graph TD; A([x.estD Read]) --> C([<]); B([minD Read]) --> C;
```

The diagram illustrates the control flow of the source code. It features three nodes: a top-left node labeled 'x.estD Read', a top-right node labeled 'minD Read', and a bottom-center node labeled '<'. Arrows from the top two nodes point to the bottom node, representing the flow of execution into the conditional statement.
