

source code:
if max_length > 0:

max_length
Read

0

>

```
graph TD; A([max_length Read]) --> C([>]); B([0]) --> C;
```

The diagram illustrates the control flow for the condition 'max_length > 0'. It consists of three nodes: a top-left node containing 'max_length Read', a top-right node containing '0', and a bottom node containing '>'. Arrows from the top-left and top-right nodes point to the bottom node, indicating that both expressions are evaluated to determine the truth of the comparison.
